

Michellino is an outstanding stallion sired by the Trakhener stallion Michelangelo and his dam is the state premium-mare Miami. Being "premium and state-premium awarded, she became reserve-champion of the Bundeschau in Verden. Her damline also produced the well-known stallion Morgenglanz, Marcellus (S-dressage) and reserve champion Mozart. At the 1991 Trakehner stallion inspection in Neumünster two of Michelangelo's sons were approved. Kennedy became champion and Guy Laroche received a premium. Michellino's damsire Ulft is by the famous Le Mexico. Ulft produced some international dressage horses, for example Blue Horse Utopia, Caesar, Disney and Intervet Baltimore. The most famous offspring by Ulft is for sure Olympic Ferro ridden by Coby van Baalen.

In the third generation we find the stallion Luctor, sired by the thoroughbred Pericles xx. Luctor was known for his excellent trot.

Michellino was reserve champion at the 100 Day Performance Test in Vilhelmsborg and now is competing successfully in dressage in Denmark at Prix St.Georges-level. Michellino started a successful career as a producer of dressage horses and has many approved sons now, as well as 58 graded mares. The dressage index of Michellino is 120 points. Six of Michellino's progeny have participated in the Young Horse Performance test in Herning. Furthermore 18 of his children have been selected for the semi-finals for the 4, 5 and 6 year old Championships in Denmark 2001. Because of these outstanding achievements Michellino has been awarded an "Elite" stallion by the Danish Warmblood Society.

According to the traditional practice, it was The Chairman of The Danish Warmblood Society Poul Graugaard who presented The Stallion of The Year to the audience, and he stated the prize giving of the Danish Warmblood Society:

"Since his approval in 1995 Michellino has been one of the most used breeding stallions within Danish Warmblood. His trade mark is progeny who are noble, very expressive and extremely well moving."

His wonderful stallion expression and supple movement impresses everyone. It is in particular his suppleness and effective "motor" that he passes on to his progeny, and that is what makes him so very much sought after in dressage today.

Michellino is known for his ability to breed progeny who is sensible and talented enough to reach the very top within the national and international dressage.
